

Problem statement 1

```
Students=["Arun","Bala","Kavi"]  
New_Students="Ravi"  
Students.append(New_Students)  
print("update Students:",Students)
```

```
Students=["Arun","Bala"]  
New_Students="Ravi"  
Students.append(New_Students)  
print("update Students:",Students)
```

```
New_Students="Mohan"  
Students.append(New_Students)  
print("update Students:",Students)
```

```
Students=[]  
New_Students="priya"  
Students.append(New_Students)  
print("update Students:",Students)
```

```
Students=["","",""]  
New_Students="priya"  
Students.append(New_Students)  
print("update Students:",Students)
```

output

```
update Students: ['Arun', 'Bala', 'Kavi', 'Ravi']
```

update Students: ['Arun', 'Bala', 'Ravi']

update Students: ['Arun', 'Bala', 'Ravi', 'Mohan']

update Students: ['priya']

update Students: ['', '', '', 'priya']
